CELLULITE TREATMENT

BodyStim by Imperium® is an innovative and non-invasive device for **body treatments** which **combines numerous integrated functions** in one system.

BodyStim by Imperium® promotes an intense workout that helps **volumize and tone the skin and muscles**, giving the body a healthier and younger appearance in a non-invasive and comfortable way.

BodyStim by Imperium® is the results of the synergy of two cutting edge technologies based on a **simultaneous combination** of **RF diathermy** associated with **Muscle Contractions** (*The Diathermocontraction® technology, patented by Brera Medical since 2010, represents a unique and unparalleled advancement in the market. This technology, continuously tested and refined over the years, stands as a singular achievement, envied and never replicated at its exceptional standards.*)

The Diathermic RF Pulse, thanks to its **biorecognized characteristics**, produces massive recruitment of fibers, preserving exceptional comfort during the treatment session.

The muscle contractions generated by the unique RF Diathermic Pulse can be combined with the thermal action produced by the same signal to promote **firming, tightening and toning of the skin**.

RENEWED TECHNOLOGIES FOR EVEN MORE SURPRISING RESULTS

thermosculpt™

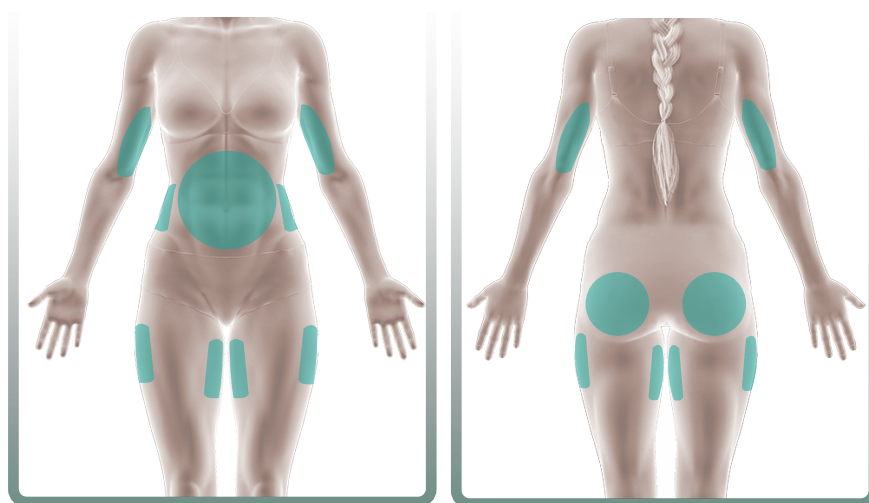

Two different sized bands each equipped with a thermal sensor made to fit various body shapes. They deliver **RF Diatermocontraction®** and they allow the treatment to be **automatically controlled** by Imperium® Body Stim.

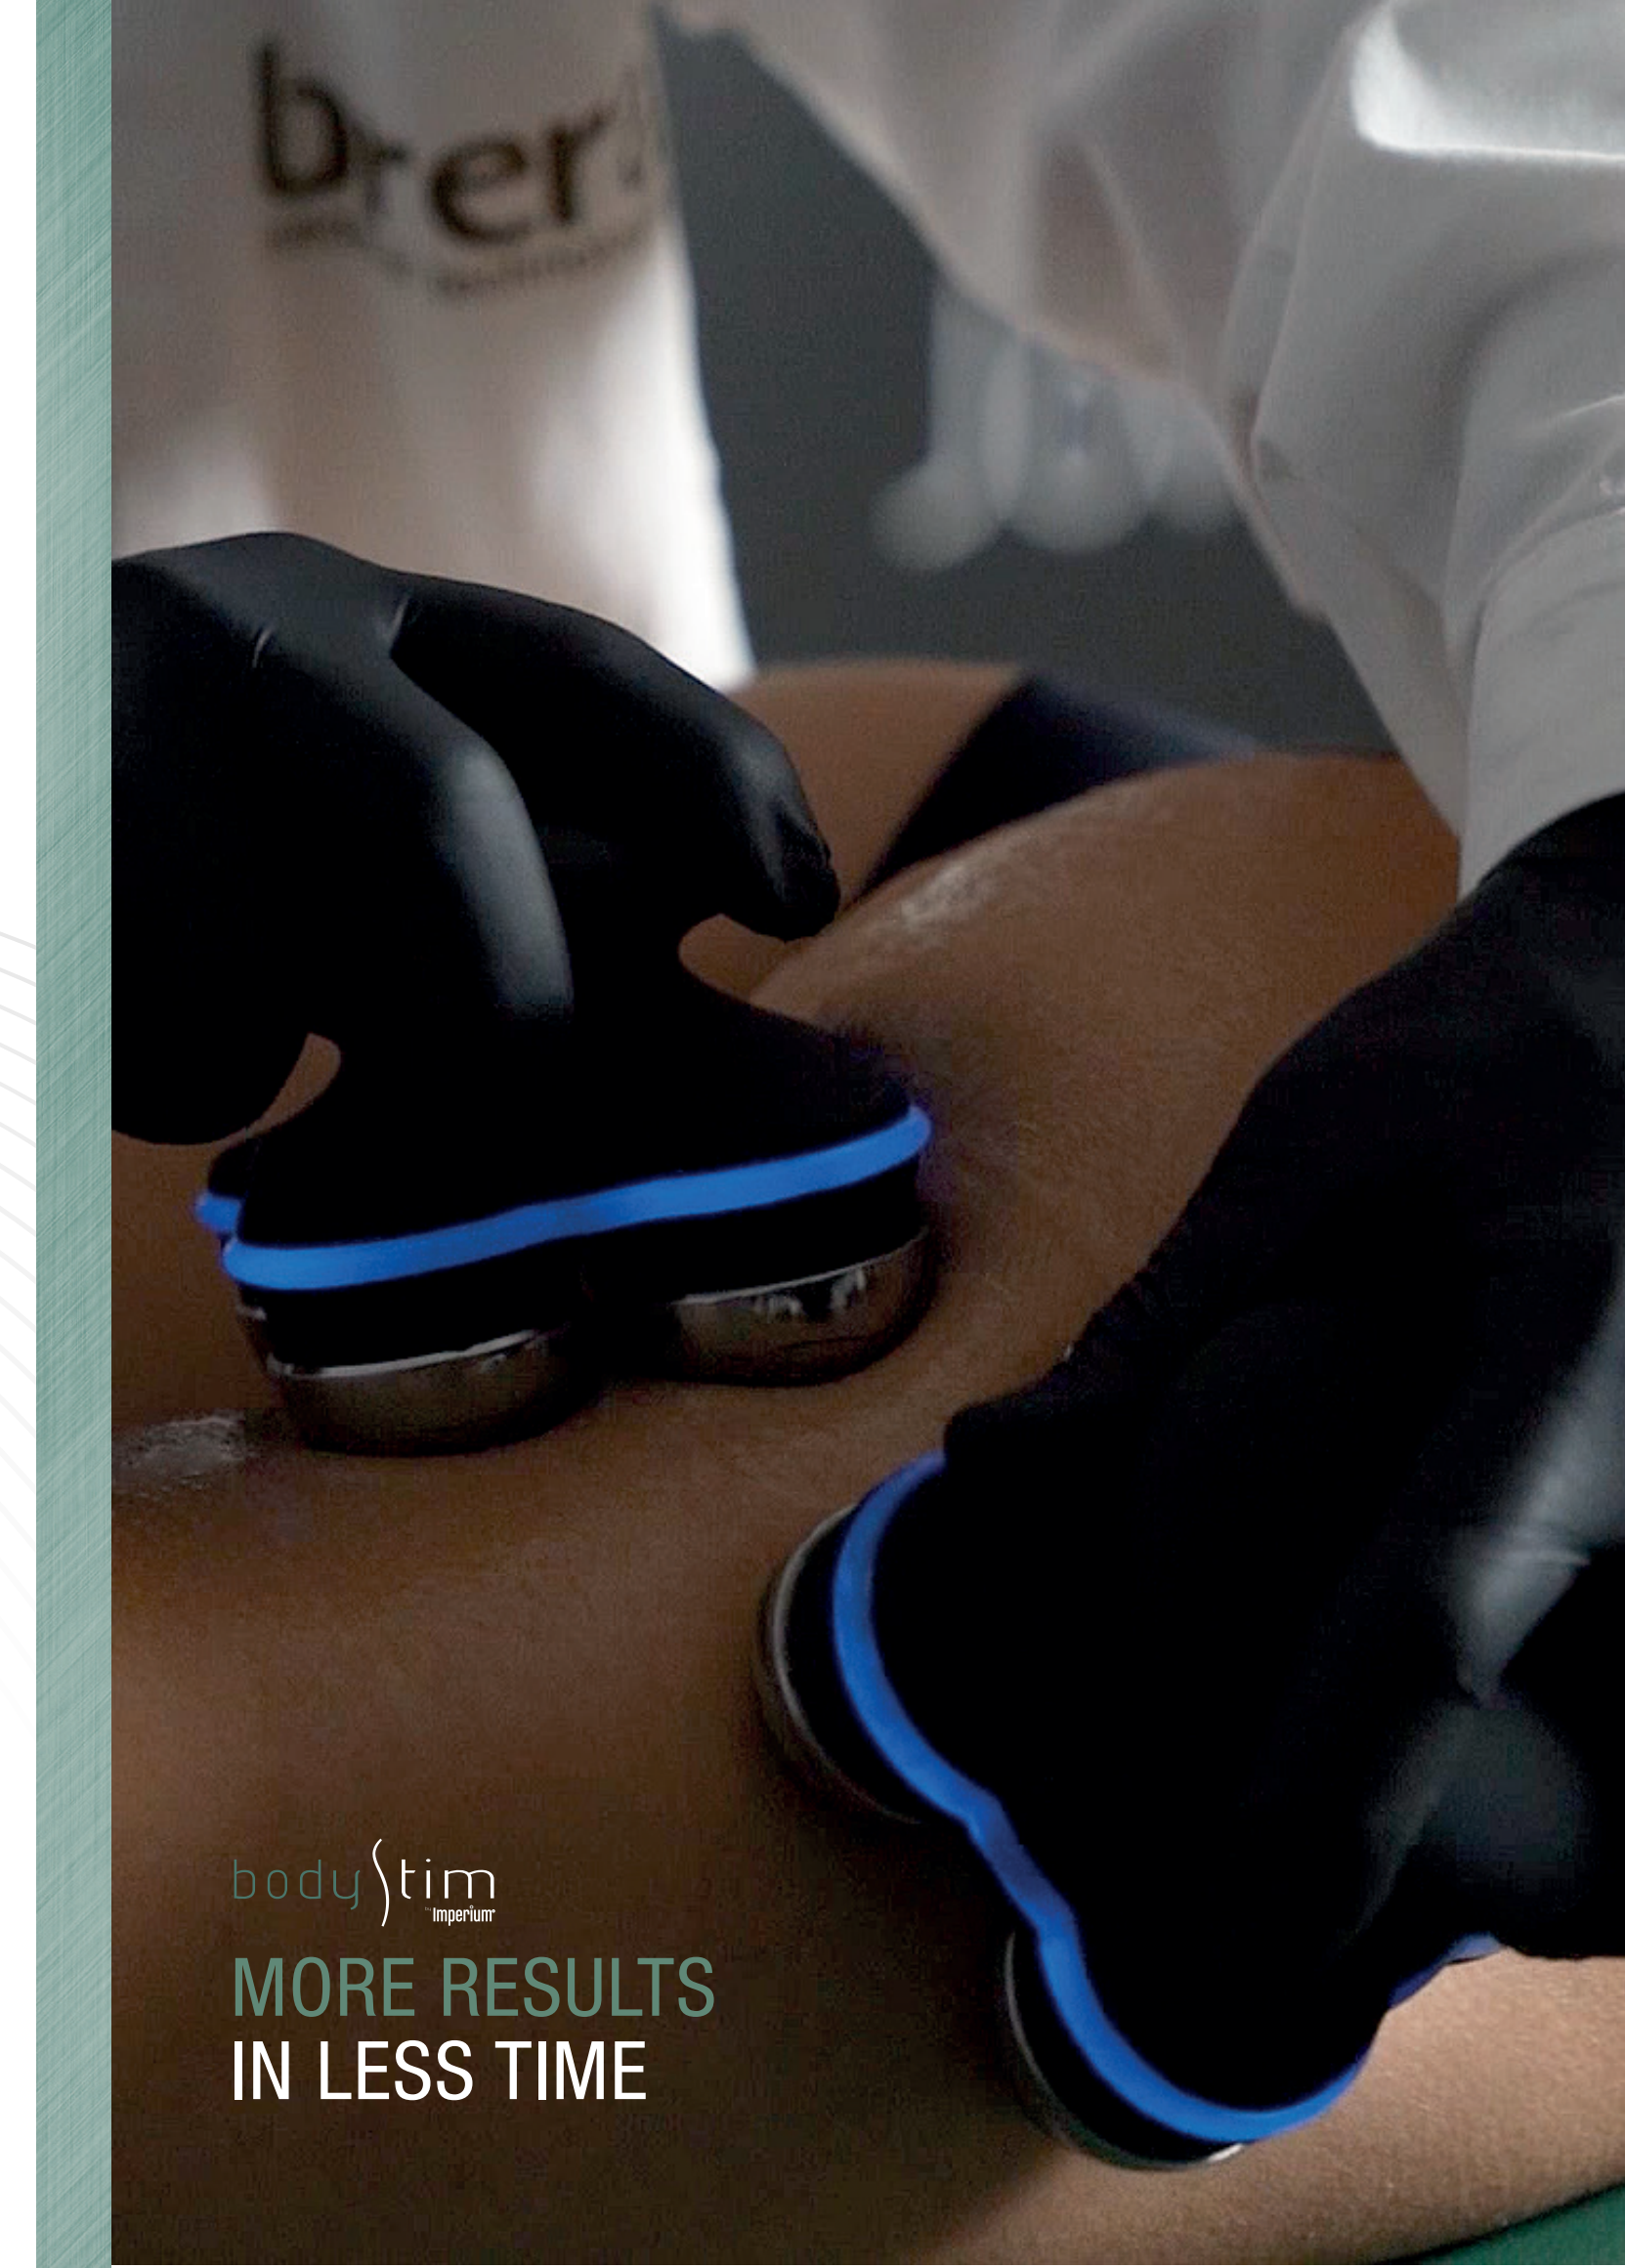

biQuad+™

A multi-polar resistive RF handpiece for body treatment with **4 electrodes that emit RF Diatermocontraction®** (also in cadence mode) equipped with a **thermal sensor**. Thanks to its design it allows a comfortable treatment that helps **sculpt and redefine the body in larger areas**.

INTENSE PHYSICAL ACTIVITY
IN LESS TIME

3 NEW DIATHERMOCONTRACTION® TREATMENT METHODS

thermosculpt™

It delivers **RF Diathermocontraction®** by treating anatomical areas, both symmetrical and asymmetrical, using different configurations and settings with the possibility of using up to **4 Pads simultaneously** (16 radio electrodes). This method is divided into **3 cyclical treatment phases (Warmup, Intensive and Cool-down)** producing results comparable to those of strong physical activity in significantly less time.

biQuad+

It delivers RF Diathermocontraction® **without the use of return electrodes** offering the versatility to treat irregular anatomical areas. This mode allows the **simultaneous use of two handpieces** with distinct configurations, guaranteeing more effective and targeted results. The customer can enjoy a **relaxing and pleasant massage** during the treatment.

hybrid

It **simultaneously integrates the effects** of Thermosculpt™ and biQuad+™ allowing the treatment of different areas of the body with personalized results based on the client's needs.

HIGH LEVEL FUNCTIONALITIES

2 Subjects / Simultaneous treatment.

2 Configurable delivery Channels.

4 Handpiece Connections.

Live control with thermal sensors.

Pad placement Tips.

Touch Screen Display.

User Friendly Software.

Elegant and Functional Trolley.

Saddle for accessories.

SPECIAL MODES

Diathermy
Booster during
the session

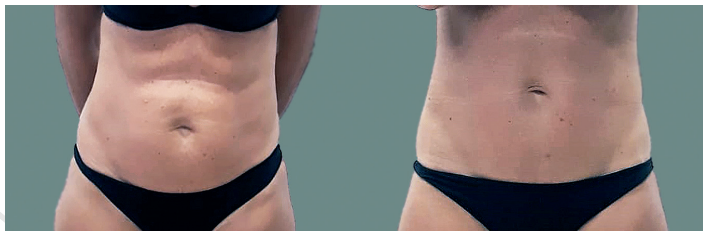

Dynamic polarity
for maximal
contraction

Toning
Intensive Muscular
Stimulation

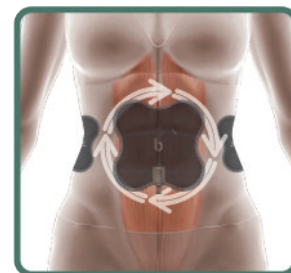

IMMEDIATE RESULTS SINCE THE FIRST TREATMENT

After six sessions of 30 min treatment.

After six sessions of 30 min treatment.

Dynamic polarity to catch all white and red muscle fibers to obtain the **maximal contraction**.

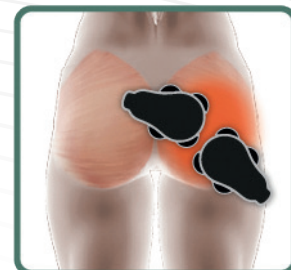

Controlled diathermic effect that **speeds up** the **metabolism** and **eliminates excess fluids**.

After eight sessions of 30 min treatment.

After six sessions of 30 min treatment.

Double biQuad+™ each with independent settings for different large areas with less treatment time.

Dynamic identification of the muscle motor points where **maximal contraction** is achieved **with less power supplied**.

Promotes **firming** and **toning** of the **skin**.

After six sessions of 30 min treatment.

Brera Medical Technologies.
A successful story, all made in Italy.

For over 40 years, Brera family has been developing and producing medical devices
for aesthetics, dermatology and physiotherapy with a profoundly Italian spirit
in its ability to create, innovate, experiment and inspire a constantly evolving market.
